Piano Playing Made Easy

To play music in any key other than that in which it is written is difficult for most performers.

Norris & Hyde Pianos

instantly transpose any song to suit any voice. They are the only pianos which transpose a full chromatic octave. With them any player can just as easily play any piece in any or all other keys as in the original key, and any singer can sing any song in exactly that key in which the voice sounds best. Instrumentalists may play in any key easiest for them.

This adds great value to these instruments, which are also superior in all other respects. They suit the most exacting critic, and are indorsed by prominent musicians everywhere. Any child can operate the Movable Key-board, and it cannot be gotten out of order. While pre-eminently instruments for the home, voice teachers, singers, churches, schools, and theaters, find them an indispensable convenience. Our Catalogue No. tells all about them. Send for it free.

LABOR DAY

Attended By Many Accidents and Fatalities at Zanesville, O.

ZANESVILLE, O., Sept. 7.—Labor day was attended by many accidents and several fatalities here. A train of six electric cars got beyond control and dashed down the "Y" bridge incline and side-wiped an approaching train. Two people were fatally injured and several others seriously. Mrs. J. B. Alexander, wife of a traveling salesman, was thrown between the cars and terribly crushed. She is at the hospital and can not live. Just McGrath, district organizer of the federation of labor, was probably fatally injured. The others injured are:

Miss Holmes, of Newark; Mr. Yoder, of Canton; Miss Bathbun, of Evans-

ville. An hour later a car jumped the track and Mrs. Charles Rodgers, of Zanesville, and Miss Ivy Brigham, of Newark, were thrown under the wheels. Physicians say they can not recover. Mr. and Mrs. Beston, variety show people, were also badly injured.

While attempting to alight from a freight train, William O. Berne, who was leaving the city for a hunting trip. was thrown under the wheels and bad ly injured. With superhuman pluck he walked a distance of two miles and died shortly after leaving the city. There were 15,000 visitors in the city.

A MONSTER

Taken From the Officers and Lynched Near Friends Mission, Va.

RALEIGH, N. C., Sept. 7.-A special from Mt. Airy, N. C., to the News and Observer says that Sunday afternoon near Friends Mission, Va., Miss Sadie Cook, a young white girl was outraged by Henry Wall, white, aged about 21. After accomplishing his purpose, Wall dealt his victim several blows over the head with a hoe, rendering her unconscious and then placing her head on a log crushed it with a stone, which was left lying bloody nearby. Wall then cut the girl's throat, severing the windpipe, and dragged the body some 50 yards up a ravine, threw it into a branch, where it was afterwards found. Meantime he went to a spring and was found washing the stains from his clothing.

The excitement became so intense that Monday afternoon Wall was taken from the officers and lynched near the scene of the crime.

NEW ORLEANS

To Enforce a Rigid Quarantine Against Biloxi and Ocean Springs, Miss.

NEW ORLEANS, La., Sept. 7.-The state board of health has decided to enforce a rigid quarantine against Biloxi and Ocean Springs. Quarantine will also be enforced against the other watering places on the gulf coast until President Oliphant returns and more light is obtained on the situation. Guards are to be put on the trains and at the stations, all baggage is to be fumigated and every precaution is to be taken to keep the disease out of the city. The Louisville & Nashville trains have been ordered not to stop at either Biloxi or Ocean Springs. The houses of all people who have returned to New Orleans in the past two days are to be thoroughly fumigated.

THE BIG GUNS

Sunk the Schooner Agnes I. Grace-She

Lies in Ten Fathoms of Water. SAVANNAH, Ga., Sept. 7.—Capt. C. D. Farrar and crew of the schooner Agnes I. Grace, which sunk 20 miles off Tybee Sunday, arrived at the city Mon- | sion. day night. Capt. Farrar states that the 16-ton guns for the coast defenses suddenly broke from their fastenings and rolled to the lee of the vessel, smashing everything in their way. The waterways were opened by the crush, and the vessel sunk in about twenty minutes. She lies in ten fathoms of water, with her top mast out of the water. It is possible that the guns can be recovered. The wreck is in the path of the coastwise vessels and is dangerous to navigation.

A \$100,000 Fire in Philadelphia.

PHILADELPHIA, Sept. 7.—Shortly after 4 o'clock Monday afternoon fire broke out in the basket and wickerware factory of John M. Rowe Sons & Co., 123 N. Water street, and in a short time extended to several adjoining buildings on Water street and several fronting on Delaware avenue. Before the flames were got under control an estimated damage of over \$100,000 had resulted, all of which is fully covered by insurance. The origin is unknown.

A Bull Derails a Train.

FORISTELL, Minn., Sept. 7.—Train No. 5, on the Wabash railroad, west bound, struck a bull a quarter of a mile west of this place Sunday night. Ten cars were derailed. The passengers in the rear cars were thrown to the floors by the shock, but none of them were hurt. An unknown tramp was instantly killed. Engineer John Egan was fatally hurt, being injured internally and badly scalded. Fireman Greasa was badly scalded on the back and legs.

Pronounced Yellow Fever.

JACKSON, Miss., Sept. 7.-Gov. Mc-Laurin has received the following telegram from the two members of the state board of health who went to Ocean Springs, Miss., Sunday to investigate the yellow fever scare: After a most thorough investigation in every conceivable light, it is the unanimous opinion of representatives of Louisiana, Alabama and Mississippi state boards of health and the Marine hospital service that the fever now prevailing in Ocean Springs is yellow fever. (Signed) H. H. Harralson, J. F. Bunter.

MESSAGES

At the Rate of 4,300 Words a Minute By the Syncronograph.

The Speed at Which Messages Can Be Sent By This New and Wonderful System is Limited Only By the Revolutions of the Electrical Dynamo.

OMAHA, Neb., Sept. 8.—The Bee Wednesday morning prints a letter from Lieut. George C. Squier, U. S. A., to Hon. E. Rosewater, giving the results of a test of the Squier-Crehore syncronograph system of telegraphing. In the letter Lieut. Squier says:

"On August 22 over a line from London via York to Aberdeen and return to London, a distance of over 1,100 miles, including over eighty 'miles of underground cable, we sent messages at the rate 4,300 words per minute, and this speed was only limited by the particular dynamo available. We have also tried a cable representing the German cable of 120 knots from here to Germany and sent over it the rate of 1,300 words per minute. Our apparatus is mounted in the general post office, London, from which point the experiments thus far

have been made." Commenting on this, the Bee says: 'By the employment of the syncronograph 500 words a minute can be easily sent across the Atlantic cable. The inventors claim that their very successful trials in England demonstrate the possibility of sending press messages between New York and Chicago at such a speed that the entire contents | him that they would not abide by any of a newspaper could be transmitted in an hour, and the statement does not appear unreasonable in the light of their recent success. The speed at which messages under this new and wonderful system may be sent is limited only by the speed at which an electrical dynamo can be made to revolve. The messages are both sent and received by the aid of a dynamo. It is believed that with the successful operation of the system, letters up to the by the telegraph at no greater cost than by the postal rates now in effect."

THE FRAUD ENJOINED. Report of Decree — The Famous \$50,° 000 Trade-mark Case Decided — C. F.

Simmons Medicine Company, St. Louis, Defeats J. H. Zeilin & Co., Philadelphia.

[From St. Louis Republic, July 4, 1893.]

"The Supreme Court of Tennessee on June 30 decided the most important trade-mark case that has ever been tried in that State and one of the largest ever tried in the Union, affirming and enlarging the opinion of the court below. The court held; 1. That Dr. M. A. Simmons, the predecessor of complainant, by extensive advertising of his celebrated remedy known as "Simmons Liver Medicine,'' made it a standard remedy for liver diseases long prior to the acquisition by J. H. Zeilin & Co. of

any rights.
2. That the assignor of J. H. Zeilin & Co., through whom they claimed the right to make the fraudulent packages enjoined, never derived any title from A. Q. Simmons to make the medicine nor to use his name or picture, and that such use by Zeilin & Co. is a fraud upon the public, and is therefore enjoined. 3. That Zeilin & Co. purposely, fraudulently labeled their medicine in imitation of complainant's medicine to unfairly appropriate the trade of the Simmons Medicine Company, and the execution of 4. Enjoined Zeilin & Co. from using their com-

petitor's trade-name, trade-marks, or symbols, or imitations thereof, to deceive the public and unfairly appropriate to themselves the trade of the C. F. Simmons Medicine Co.

5. Enjoined Zeilin & Co., from deceiving and practicing a fraud upon the public by labeling their packages in imitation of the wrappers and trade-

marks of the complainant.

6. Enjoined Zeilin & Co. from the manufacture and sale of the medicine under the name of "Simmons Liver Medicine," or "Dr. Simmons Liver Medicine," or " Liver Medicine by A. Q. Simmons, and from using the picture of A. Q. Simmons in 7. Enjoined Zeilin & Co., their assignees, agents and employes from deceiving and practicing a frand

upon the public by the sale of packages thus falsely labeled, either upon orders or calls for the genuine "Simmons Liver Medicine" of complainant, or in any package thus falsely labeled. 8. The court stated that it was the purpose of the court to entirely destroy the fraudulently labeled packages above described, and cause their removal from the market, and ordered Zeilin & Co. to deliver

to the clerk to be destroyed, all cuts, dies, electrotypes, engravings and other paraphernalia used in impressing either of the above names or the picture of A. Q. Simmons. 9. Decreed that Zeilin & Co. pay all the damager which have accrued to complainant by the sale of these fraudulently labeled packages. The damages claimed by complainant were \$50,000. 10. Decreed that Zeilin & Co, pay all the costs, which amount to several thousand dollars, the record

being one of the largest ever filed in the Supreme Cheap Medicine. As a rule, "cheap medicine" is inert, worthless, or dangerous. In Zeilin & Co.'s answer to our bill they said the packages enjoined were designed as "cheap negro medicine for the negroes of the Mississipp Valley.'' Now, as Zellin & Co.'s advertisements say and their manager swore, that all the liver medicine which they make is made by the same formula, is this and advertisements, that all the liver medicine emanating from them is "Cheap Negro Medicine?" Question: Do the sick of America desire "Cheap Negro Medicine?" Let the afflicted answer by their future purchases. Dr. M. A. Simmons' Liver Medicine, established in 1840, is not "cheap medicine." It is "no cure all," and is only recom-

WHEN WRITING TO ADVERTISERS

IT CANNOT BE.

It cannot be that He who made This wondrous world for our delight-Designed that all its charms should fade And pass forever from our sight; That all should wither and decay. And know on earth no life but this, With only one finite survey Of all its beauty and its bliss.

It cannot be that all the years Of toil and care and grief we live Shall find no recompense but tears, No sweet return that earth can give; That all that leads us to aspire And struggle onward to achieve, With every unattained desire, Was given only to deceive.

It cannot be that after all The mighty conquests of the mind, Our thoughts shall pass beyond recall And leave no record here behind: That all our dreams of love and fame, And hopes that time has swept away, All that enthralled this mortal frame, Shall not return some other day.

It cannot be that all the ties Of kindred souls and loving hearts Are broken when this body dies, And the immortal mind departs; That no serener light shall break At last upon our mortal eyes, To guide us as our footsteps make The pilgrimage to Paradise. -David Banks Sickels, in N. Y. Sun.

THE OLD SILVER TRAIL.

BY MARY E. STICKNEY.

[Copyright 1896, by J. B. Lippincott Co.]

CHAPTER II.—CONTINUEL.

The stranger turned quickly, wrenching aside one end of the shattered pole. "No; he is all right," he reassuringly declared, when a hasty examination had revealed but a slight abrasion on the adventured leg. "But you, Miss Meredith, are you really unharmed? It was such a nasty fall—on this gridiron of a bridge."

"But I did not fall; I jumped," she quickly retorted, with the sensitiveness of a skilled rider to such charge of clumsiness. She gasped a little for breath, turning about to place her back to the storm as she added: "I was looking for the trail which leads across by the Mascot mine. Perhaps you can tell me where it turns off."

"Oh, certainly. I came that way myself only a few minutes ago. It is about a mile back."

"A mile back! I missed it, then," she disappointedly exclaimed, her teeth closing suddenly on her under lip as she glanced down at her left wrist, her cheeks turning rather white. "I have so much farther to go."

"But you are hurt, Miss Meredith; I am sure you are," he solicitously re turned. "What can I do for you? Is it your wrist?"

"I believe I did twist it a little," she murmured, dubiously regarding the long wrinkled glove which covered the now intense aching. "It is nothing, of course, but-"

"You are faint!" he cried, casting loose the bridle-rein he had been holding, and making as though he thought he should offer the support of his arm. "Can you walk to this log beyond the bridge?—Yes; that is right; sit there while I get you some water." dashed down to the water's edge, where some campers had left a litter with it dripping full. "If you could drink from this-" he urged, deprecatingly "It is clean, in spite of the rust; and

I'm afraid it is the best I can do." "It does beautifully, thanks," she

rude cup; adding, when she had drunk of it, "I never fainted in my life; there has helped me."

"But it has leaked all over your dress," he cried, dismayedly, as though charging himself with the damage. "But the heavens have already leaked

so much, a little more will hardly matter," she returned, faintly smiling, as she stood up again. "And, by all the signs, I am likely to be wetter. I must be making for shelter as fast as I can." "But will you not let me see the

wrist?" he anxiously interposed. "You are sure that it is not broken?" "Oh, it couldn't be," she protested, al-

though she looked frightened at the suggestion.

"We'll hope not, surely; but won't you take off the glove, please?" kid, holding out the injured member in one corner with an anvil at one side,

and fro with a sort of reverent hesitancy, anxiously glancing at her face to see if he were giving pain. "No; it is only a sprain, and not a very bad one, I hope," he decided, in a tone of relief. "But of course it is paining you. You must let me bind it up with water. It will be better than nothing." And he hurried away to dip his handkerchief in the stream, folding it to a compress as he came back.

"But I am sure that is not necessary." Dorothy protested, drawing back. "Not strictly necessary, perhaps; but

wrist, with all the roaring of the storm, the rain now developing to a torrent, ranchman who had come to her relief. He was clothed in the brown duck of the miners' common wear, his pantaloons tucked into the tops of a pair of high, heavy boots laced across the instep, the soft felt hat pulled low over his eyes more than anything else betraying his occupation in its splashes of candle-grease. But Dorothy knew her Rocky mountain world too well to think of gauging the man's position by the chance appearance of his clothes. That he was engaged in mining was evident; but he might be a tyro from the east, out of luck and toiling for daily wage; or he might be the owner of the richest property in all the district. Whatever his present standing, there was that in the modulations of his voice, in his niceties of speech, which told of a sometime environment very remote from the rude life of the mining camp. That he was a gentleman appeared to her beyond question, while her woman's instinct had been quick to decide that he was one to be trusted; moreover, there was something about him that struck her as oddly familiar. Was he one of the boarders at the hotel, and had she seen him there? There seemed an assured friendliness about his manner which implied some measure of previous acquaintance. "You will show me the way?" she anxiously exclaimed, flushing a little to be detected in intent study of his looks as he glanced up.

"Certainly. But you will have to let me lift you on your horse, Miss Meredith; with your wrist you must not try to help yourself at all," he said, in a matter-of-fact way, stooping a little to be heard above the noise of the storm; and with the words his strong hands closed about her waist, raising her to the saddle as though she had

"You need not have done that," she protested, rather sharply. "I could have mounted myself perfectly well."

"I beg pardon, but I am sure it was better you should not try," he imperturbably returned, picking up her whip from the ground. "It is such a mercy that it is not the left wrist; you can hold the rein all right," he went on, with a gratulatory smile. "And there's another silver lining to the cloud. There's an old shack of a shaft-house up the draw there, where we can get under cover until the worst of this is

"But my father is waiting for me at the Grubstake mine," gasped the girl, ducking her head before a furious onslaught of wind and rain. "I must get there as soon as possible."

"But it is not possible to get there in such a deluge as this," he protested. He had mounted his own horse, and now rode up beside her. "Your father could not expect you."

"Oh, but he would. He would be frightened. I must get there."

"See here, Miss Meredith," he impatiently exclaimed, with an air of driving an unwilling bargain, "you cannot go on in a storm like this. It will be raining cats and dogs within three minutes. If you will only let me get you under shelter, I will ride on myself to the Grubstake, if you say so, and let your father know that you are all right. Ah, you must!" he insisted, as a fiercer gust swept down the rough defile, causing the girl to crouch low over the horse's neck.

CHAPTER III.

They had not far to go, but it was a ough climb, and the young man's first words were of apology when, springing to the ground, he came back to seize her horse by the bit and guide him up the last few feet over an almost perpendicular mass of loose gray rock.

"I would have gone round by the trail f I had known it was quite so rough; but we're all right now," he said, turning to try the door of the rude hut to which they had come. The horses were huddled together on a small, rhomboidal bit of ground formed at the top of an old dump pile, which went crumbling away in a sheer descent far down among the trees, some of which had been half buried in the lava-like flow. At the left yawned the mouth of tellectual force in the high forehead, was not the slightest danger of that; a tunnel about which appeared no sign uprightness in the frank glance, which but I felt a little queered. The water of recent work, while the rough slab door of the shanty was fastened by a chain and padlock so rusted that they seemed to have been exposed to the storms of years. By no means daunted by this obstacle, however, the young man coolly caught up a jagged piece of rock and in a moment the staple was | it was a goodly face to look upon, a face broken and the door thrown open.

"If you will just step inside while I run the horses into the tunnel-" he hastily advised, when he had lifted her to the ground. Dorothy needed no second bidding, but once within the door she paused, peering about doubtfully. It was nothing more than a rude smithy, obviously designed merely for the sharpening of drills used in the tunnel, its floor the bare, brown earth, She obediently drew off the sodden its only equipment a great stone forge for his inspection. He took the small a few empty candle-boxes, a small pile hand by its finger-tips, swaying it to of wood, and some picks and drills thrown down with other undistin-

> guishable rubbish in one corner. "It is not quite the lap of luxury, but we might do worse," the stranger smilingly observed, as he came back, carrying his hat filled with pine cones, while he was further laden with an armful of broken sticks. "And a fire will help the looks of things amazingly."

"To say nothing of the comfort of it," Miss Meredith rejoined, her teeth chattering as she smiled. "How cold it has lessly exclaimed. "It was at grown!"

"That is the worst of this much

> "'I have seen the fire-I am warmed," the girl smilingly quoted, holding out her hands to the blaze. "It is lovely."

"And now won't you sit down and make yourself comfortable?" He turned a candle-box on end for her as he spoke.

"But the box is so low and the fire is so high," she smilingly objected. "I should only be warming the tip of my nose, and I am half frozen."

"Are you?" He looked as dismayed his good looks a moment ago, so was as though he accepted the statement literally. "But of course you are. What can I do?" He answered the question for himself by recklessly heaping upon the forge the greater part of all the dry

to think of meeting you again in this out of-the-way place," she said

debris in the corner a dusty gunnysack, which he held up before him as if dubiously measuring its possibilities.

"It won't do; it is not half big enough," Dorothy exclaimed, divining his idea with a merry laugh.

"I suppose not; and it is so abominably dirty besides," he disgustedly rejoined, his laugh by no means so gay as hers, as he threw the thing back where he had found it. "But you ought to have something around you; you will have your death of cold. I am afraid my coat is as wet as your dress," anxiously feeling the sleeve.

"And I could not think of taking it if it were not," she decidedly returned. "Please don't trouble; I am doing beautifully. It is such a glorious fire."

"But still, with all the draughts in this sieve of a place— Oh, I say, why can't I put the box up on the forge for you, to the windward of the smokeso," suiting the action to the words, and hastily adding a small erection of sticks to save her feet from contact with the ashes. "Now, Miss Meredith, you won't find this half bad, I promise you. Come." He confidently held out his hand to assist her.

"But I cannot," the girl protested, laughing at the idea, even though as she spoke she yielded the point, meek ly permitting herself to try the strange construction. "I feel like Patience on a monument, smiling at grief," she laughingly observed, glancing about from the high perch.

"And will I do to personate grief?" he amusedly returned. "Niobe could hardly have been wetter than I, I fancy But-heavens!-hear that downpour We are here just in time, you see, Miss

Meredith." "Yes," she replied, listening with an awed face to the thunderous beating upon the roof. "And it is leaking over there in the corner—see."

"But it is all right where you are," he reassuringly returned. "And are you getting warm? Can I do anything to make you more comfortable?"

"I am doing beautifully, thanks." There was a puzzled light in her eyes as she looked at him with a glance that swiftly took note of his dark brown close-cropped hair, showing a tendency to curl at the ends, which lay damp against his forehead, the clear, grayblue eyes, the dark moustache, and the square-cut chin beneath. It was a strong, masterful face, fine-looking rather than handsome. There was inhad a way of flashing in light of humor. exquisitely contagious when he smiled. In that smile lay his strongest claim to real beauty, softening and brightening the whole face, which expressed something of severity, almost of sadness, in repose. But even when he was grave to like and remember. If in any part of the world she had ever met this man before, Dorothy thought, it would seem that she could hardly fail to recognize him now, even under the partial disguise of his rough mining garb, and yet---

"I beg pardon; you were about to say something?" he asked, as with a little catch in her breath she looked away, meeting his glance.

"It was nothing, only-" hesitating, with a shy little smile that made her divinely pretty in the dancing firelight, "it struck me that I had possibly met you somewhere before to-day."

"I think you have, Miss Meredith," he answered, smiling so broadly that she must note how even were the strong white teeth showing under the brown moustache. "But I hardly expected that you would remember it," he added.

She looked at him for an instant in silence, the puzzled expression suddenly changing to a flashing smile of recognition. "I know," she breathworld's fair!-It was you who-"

"Who turned burglar to filch your it may somewhat relieve the pain. You vaunted climate; it has a capacity for liacket from the Colorado building in Ends.

smilingly finished, as she hesitated. "And to think of meeting you again

with an excited little laugh, surveying met you to-day; but I did not half see your face that night, and that it could be you-of course such a thing could not enter my mind." She looked at him again, as though reduced to speechlessness for the wonder of it, while he laughed amusedly, saying nothing. "Of course I guessed that you might be from Colorado, from your familiarity with the building," she presently went on, "but to think of running across you here, of all places."

"And I fancied also that you might be from Colorado," he rejoined, looking up at her with pleased eyes. Just as she had been keen to take account of he missing no charm of the bronzebrown hair with its soft love-locks pressed flat against her forehead where her riding-cap had been, no curve of the daintily rounded form, so trimly displayed in the well-fitting habit, of the wildrose bloom of her face with its gray eyes, that now looked black in the shadows, of the enticing lines of the small mouth, where pride and passion seemed equally blended. But, unlike her, he would make no reservations; her beauty in his eyes was simply perfect. And he could not say that he had not seen her face on the night of which she spoke, in the gleam of the electric lights he had admired her then just as he did now, and not one detail of her loveliness had been forgotten. "I was so sure of it, indeed, that I hung round the building for days, hoping you would come again, but you never did."

morning," she replied, her cheeks grown rosier for this frank confession, "That was the reason I was so anxious to have my jacket. It was such a shock to me to find the building closed for the night; I believe I was on the verge of bursting into tears when you appeared. What a funny little adventure wood that had been in the hut; from it was! I shall never forget how I stood which he turned to fish out from the outside and trembled while you prowled about hunting my property. I think I counted on nothing less than arrest for us both if you were discovered."

"No; we left for the east the next

"It might have been temporarily embarrassing, but you had the check to show that the coat was yours, and since they had carelessly neglected to bolt the one side of the door to the floor, so that the lock gave way so easily-well, they should have been thankful that only such honest folk went in."

[TO BE CONTINUED.]

THE SENATOR'S COW.

Deal That Cost the Statesman Very Heavily.

When, in a certain legislative proceeding, it was proposed to make an appropriation in a series of expenditures that never came to an end, Hon. Philetus Sawyer, then a United States senator from Wisconsin, said that the case reminded him of a cow that he once had on his farm. He told the story thus: "Once, when we were living on the farm a man came along and wanted to buy a certain ccw. I offered him another, but nothing would do but the one he had pointed out. Then I told him that that cow was one I had given to my wife and that I could not sell it without her

"'Well,' said the man, 'wouldn't she ell the cow?"

"I went into the house and asked my wife if I should sell the cow. "'Oh, yes,' she said, 'but I want the

"I sold the cow for \$20, gave my wife

we dollars, and said: "'Call on me when you want more. "Then after that, when my wife wanted a dress, a bonnet, or money to get a wedding present, she would ask me for some of that cow money. I had paid her several thousand dollars of it, and wondered when the credit would be exhausted, when we built a house. Then it had to be furnished. We figured up what the cost would be of the things wanted, and found that it amounted to several thousand dollars. I said:

"'Wife, I'll pay you the balance of that cow money, and you can pay for furnishing the house with it.'

"It was a bargain, and at last the cow deal was over. That animal cost me not far from \$20,000; but it was all right."-Youth's Companion.

Abhorred by Nature.

The conversation had dragged some what and she decided that he didr't amount to much intellectually.

"It must be unpleasant," she observed, after a wearisome silence, "for you to be so generally unpopular." The dude stared stonily and gasped

"Unpopular?" he repeated, his pale face flushing a trifle; "why, I'm sure I didn't know-"

The glance that she directed toward him was not unkind. It was only pity-

"Nature abhors a vacuum, you know," she said, gently. The silence that followed was so thick that it formed an impenetrable barrier between them for many years .- N. Y.

A Present for a Husband. Furniture Dealer - Yes, madame, there is no nicer present for a man than a handsome writing desk. Look at this one, for example.

Customer-It's very pretty; but what re all those square things? "Drawers, madame; that desk has 160

separate drawers." "Huh! And every time he mislays anything he'll expect me to find it. Show me a desk with one drawer."-N. Y. Weekly.

The Retort Courteous. Dawson-What is your business. may I ask?

Boorish Stranger-I'm a gentleman, sir. That's my business. "Ah! You failed, I see." -- Odds and MOOSEHORN CORNER.

Its Unique Guideboard from Which It Got Its Name.

The guideboard which has stood at Moosehorn Corner, Blanchard, Me. country crossroads for 60 years is famous all over New England, and is visited and admired by hundreds of tourists every summer. The idea of using the blades of moose antlers instead of boards for telling the public the names of and distances to near-by places originated in the brain of Tom Puffer, the giant blacksmith of Piscataquis county, who owned a shop at the corner now called Moosehorn. 📑 the center of four crossroads he put down a stout post, upon which he strapped the antlers of two gigantic moose, one above the other, and placed at right angles, so half an antler pointed down every road. The name of the town and its distance were painted upon the antler blades, and for more than a quarter of a century the town of Blanchard had the most valuable guideboard in the union.

Blacksmith Puffer created his moosehorn guideboard 62 years ago this summer. After his death the boys took liberties with it, and finally succeeded in shooting the upper set of antlers away, The lower set is in place to-day. Upon one blade, painted in rude letters, is was devised by James T. Fields, her this inscription: "Munson, 6 miles." On the opposite horn the reading is: "Blueberry Plains, 21/2 miles." The antlers measure 72 inches from tip to tip, and the blades are eight inches wide. Old residents say that the upper set, which the boys used for a target, was considerably larger, with much his small and unpretentious house at wider blades.

Seventy-five years ago, when the region north of Dover was a wilderness. Puffer went there and put up a blacksmith shop, getting his trade from the outgoing and incoming woods teams. When he was not busy in his shop he made long trips in the woods. One spring, when he was cruising on the north side of Bald mountain, which is west of Moosehead lake, he came upon a clearing that was thickly strewn with around their names and wrote: "These antlers of moose and caribou. They are like the lilies of the field; they toil were so plentiful that he said that he not, neither do they spin." could fill a long rack with them without starting up his cart. He brought down several boat loads to Blanchard and cut them up for handles for hunting knives. which he forged in his shop. The widest moose antlers he saved, hoping he would be able to sell them. One set of moose horns, so tall that when set up on end a man could walk under the arch with out touching it, is believed to be the largest pair ever worn upon earth Charles Dutton, an aged resident, who saw them when Puffer was alive, says they were fully eight feet from tip to tip. If his estimate is correct, they were larger than the horns of the largest Irish elk that has been found.

Puffer soon found that it was easier to find moose horn than it was to sel them. He was getting old and rich, and a few years before he sold out his shop the put up the moose-horn guideboard which has made the corner famous Two or three years before his death h moved to Exeter and made a will, leav ing his money to the town and requesting that the great antlers be placed above his grave for a monument. His grave is now marked by a marble slab The town got the money and spent it for current expenses. Nobody knows where the moose antlers went. If anybody has them to-day he can sell them for \$2,000.-N. Y. Sun.

HOW TO ROB TRAINS. Theory of a Noted Criminal Who Did

It Once Too Often. James True, the train robber, is in jail here, accused of holding up a train single-handed. True is a fine looking man, about 35 years of age, and while he has a cool, determined looking air about him, he is not a person who would be picked out as one of the most daring train robbers of modern times. The charge against him was made by the United States authorities for the reason, as alleged, that he robbed a mail car. The offense was committed last winter at Uintah, Utah. Newspaper readers will remember about the holding up of a train at that place, the robbery of the mail and express cars and the terrorizing of the passengers. At first it was declared that a large band of masked men had attacked the train, and that hundreds of shots were fired to create the impression that there was a small army of robbers.

After it was all over, however, it was ascertained that the deed was the work of one man. He had gone swaggering through the train and alongside of it crying out orders to his "men," accompanying each order with a vicious oath and a pistol shot. The trainmen and the passengers concluded that a band of robbers had surrounded them and were lying alongside the railroad track ready to send a volley of rifle bullets into the train at the command of the leader. The robber is said to have secured a lot of rich booty from the mail car, but he was unable to get into the safe of the express car, and contented himself with small articles. A hot search was immediately made

for the robber through the mountains about Uintah, but without success. Sheriffs, constables and detectives finally abandoned the search, but Uncle Sam's men never grew weary, and it is claimed that a strong case has been made against True. It is claimed that the prisoner was formerly a railroad man, and that he was at one time the leader of an organized band of robbers in Colorado. He says that he has a wife and children residing in Utah .-Sacramento (Cal.) Bee.

An Old Orchard.

An orchard of 75 trees, which have been bearing for more than 60 years, on the farm of Henry Davidson, near Whitesville, Ind., has for the last five years yielded a better quality of fruit and more of it than it did a score of years ago.-Chicago Inter Ocean.

-Three of a kind would have scooped the ark, as it held nothing but pairs .-Chicago News.

PERSONAL AND IMPERSONAL

-"Judge" Elijah A. Parsons, who died at Towanda, Pa., a few days ago. was one of the oldest editors in that state, having been actively engaged in newspaper work about & years. He was long the editor of the Bradford

Argus. -When Mary N. Murfree-Charles Egbert Craddock-was a young girl, being barred by physical infirmity from athletic pleasures, picnics, tramps, etc., she would spend the time at her mirror, and greet her young friends on their return, a vision of radiant beauty.

-James Whitcomb Riley's father insisted on his reading law when he was a boy; but one hot afternoon the young fellow slid out of the office, and ran away to beat the drum for a patent medicine and concert wagon. He kept it up through the rest of the season.

· -Norman B. Covert, a 78-year-old citizen of Ann Arbor, Mich., has been converted from Methodism to Brahminism. He is supposed to be the only American convert to that creed, and he has not adopted all of its doctrines, for he will not abstain from the use of animal flesh for food.

-One of Elizabeth Phelps Ward's best titles, "Men, Women and Ghosts," publisher. Mrs. Ward's favorites among her own short stories are: "A Madonna of the Tubs," "Jack the Fisherman." "The Supply at Saint Agatha's" and "The Bell of Saint Basil's."

-Col. Higginson, with his wife and daughter, is summering in Europe. In Cambridge, Mass., the evidences of culture and the implements of his craft are everywhere. He is a kindly and gracious host, and a delightful figure on

any occasion, despite his 70-odd years. -De Quincy was once obliged to fill up a census paper. He entered his own occupation as "writer to the magazines," but was puzzled in regard to entering the occupations of his three daughters. He finally drew a ring

-Prof. Langley, of the Smithsonian institution, for the first time in some years attended the meeting of the French Academy of Sciences a few years ago. The president noticed the fact, and reviewed Prof. Langley's work in physics. M. Berthelot greeted him on behalf of French aeronauts. Mr. Langley assured the academy that he had obtained very interesting results with his steam aeroplanes. He will soon lay before the public a detailed account of all that he has done.

ENGLISH HANDS.

Well-Known Palmist Finds Fine Qualities in Them.

Mme. Thebes, the well-known palmist, went to England recently with the intention of studying the hands of certain prominent English people, her ultimate object being to ascertain, by means of such study, the causes of Great Britain's greatness. She has now returned to Paris, and has given a curious ac-

count of her experiences in England. "Theaverage English hand," she says, 'clearly denotes happiness. All these hands are firm and slightly red, and the fingers are square, which is the token of punctuality, good sense, energy and activity. Honesty is also denoted, and this will not surprise those who know how upright Englishmen are. The English women have long thumbs, which is a sign of strong will unless contrary lines in the hands modify this tendency. Now, all these qualities which I have mentioned are good, and those who possess them are naturally

happy and fortunate. "Furthermore, I examined nearly a thousand hands among all classes of society-courtiers, as well as working people-and in all I found one very characteristic sign, namely, the sentiment of unity of the Anglo-Saxon race. This sign is not to be found in French hands. According to a person's rank and social position in France will his or her hand be. By means of the hand I can always, in France, distinguish the aristocrat from the plebeian.

"In English hands there are no traces of organic diseases. In the thousands which I examined I found only one case of typhoid fever, and in this instance the disease was contracted abroad. No one who knows the progress of hygiene in England can be surprised at this absence of disease. Neither did I find in the hands of members of the English court any presages of accidents, such as I have found in French hands, nor of revolution, such as I have found at the court of Italy.

"In what respects the English hands differ from the French and Italian hands I cannot yet say, but I intend to return to England and to Italy, and to study the subject thoroughly I will also go to Germany and to Russia, and I expect to make some curious discov-

"The usefulness of such work is manifest, though at the same time it is certain that many of the casualities foreshadowed by the hands cannot, as a rule, be avoided. A person who is threatened with a violent blow on the head will find it very difficult to escape it. Still, by the use of will power and by taking all necessary precautions it may be avoided. I have seen in the hands of many young women unquestionably indications of injury through someiron instrument, and, as all of them rode bicycles, I unhesitatingly advised them to give up the amusement."-N. Y. Herald.

The Climax of Absurdity. Isaacs-I tried to read vun of dem Scotch nofels: but, 1 dells you, dot

dialegt is ridigulous. Cohenstein—So? "It's awful. T'ink of callin' a body of vater 'a burn!"-Puck.

Your Vitality?

The essence of life is force. Every breath you breathe, every heart beat, every motion of your hand, takes force. The measure of force we call vitality. If this is lacking, there is loss of flesh, lack of resistive power, a tendency to catch disease easily, especially a tendency to Consumption. For low vitality nothing is better than Scott's Emulsion. It supplies force by furnishing the nourishing, strengthening elements of food in an easily digested form; enriches the blood, and builds up the system. When ordinary food is of no avail, Scott's Emulsion will supply the body with all the vital elements of life.

Two sizes, 50 cts. and \$1.00. All druggists.

If you will ask for it we will send you a book telling you all about Scott's Emulsion. Free.

AMODERN TROUBADOUR.

BY RENE S. PARKS.

[Copyright, 1897.]

THE words of the trivial little song rang out blithely in a clear treble voice through which the tinkle of a mandolin penetrated. Kenneth Harding heard it as he strode moodily along, and idly wondered that such sounds should be heard in that particular spot, as it was at least five miles from any habitation. It must be confessed that he was not over-pleased. He was unhappy, and unhappiness is always unreasonable; so it seemed to him a distinct grievance that he should be compelled to listen to anything like frivolous gayety out there on a lonely path which he had

sought just because it was lonely. In another moment, as he turned the bend of the road, he came in sight of a boyish figure stretched carelessly under a tree by the wayside, half leaning against its trunk, half resting on his elbow, while he touched the strings in a light accompaniment.

> "She's a darling, she's a queen! She's the fairest one I've seen,"

he sang gayly, then suddenly stopped as he saw Harding approach and, half unconsciously, as it seemed, turned to the hurt had not yet ceased to sting. wheel that stood beside him. This aphe merely altered his position so that

amusement. "Positively, the boy is shy!" he

adays! Suits his face, though." Harding trudged on, quickly forget ting the momentary interruption of the That they were not pleasant thoughts was evident from the stern, hard expression on his sensitive face and the moody misery in his gray eyes.

At last, wearied, he flung himself under a tree, and with hands clasped under his head, closed his eyes. He opened them soon, however, disturbed by a faint sound—opened them in time to see the boy whom he had heard singing dart past on his wheel, the mandolin slung, satchelwise, over his back.

Again Harding smiled grimly. "Truly a sentimental youth," he soliloquized-"a modern troubadour awheel! Just the type too. Blonde, curly hair, bright brown eyes, handsome face, not exactly weak but a little effeminate. Quite the ideal troubadour with his mandolin and his fresh young voice. He looks about 16. Will be sing as gayly at 26, I wonder?"

Harding's bitter soliloquy ended in a laugh even more bitter. Putting one hand in the breast-pocket of his coat, he drew out an envelope, worn and dingy. Slowly he extracted the contents—a letter and a photograph. The latter which represented a young man with a fine, strong face, intellectual and attractive, was his own picture; he allowed it to fall from his fingers as he opened the letter and read:

"DEAR KEN: Try to forgive me. I am very unhappy, but I could not help it. Indeed | him. I love you, but you are so poor, and I am afraid that we should both be miserable; and Mr. Brown is rich, and mamma insists Bartholemew's next month. Do forgive me, and won't you come to my wedding? Why should we not be friends just the were engaged. Mamma said I had better not tell him. Do write me. Your loving "DORA."

The young man's face grew contemptuous as he read, with a revulsion of feeling that startled him.

"Good heavens!" he exclaimed, "what a fool I am to care—to be made miserable by a weak, bad woman, capable of continuing to play at love with me after her marriage. True to no one-neither women for me!

again.

A day or two later Harding was pass-

ever, Harding espied the wheel leaning very much at your service!" against the same tree as before, and near it lay the boy, sound asleep, the mandolin beside him, his soft cap pulled down as if to shade his eyes from any not? Have you Vagabondia with you? stray sunbeam that might find its way Ah, there it is!" and Harding seized through the heavy leafage.

Almost involuntarily stopped, and a sudden impulse of mis- McGee," turning the leaves meanwhile thief took possession of him. Going until he found the poem. He read on now arguing that the moon is in the and, supposing that he was a mosquito, closer to the sleeper, close enough to to the end, and his companion clapped shape of a plumb bob, and that the note the curve of the lips, firm yet his hands.

that lay on the clear sun-browned skin, | nius in its line!" he said, "and how he said to himself: "Yes, he would be a well you read. Please don't stop!" jolly little comrade, I'm certain; so

"'Twas on a summer's eve when roses bloom"—the words rang out on the quiet air. Instantly the boy's eyes opened, and flushing crimson from brow to throat, he sprang to his feet. "Why-who-who are you?" he stam-

"A fellow troubadour," responded Harding, pleasantly. "I heard you sing a few days ago, and caught a fleeting glimpse of you to-day. Catching you asleep, I took the liberty of waking you with your own song, for the selfish reason that I was lonely and thought you would, perhaps, give me a few moments of comradeship - as a troubadour should."

The flush had not quite left the boy's face, but he laughed responsively and said: "Very well, Sir Knight. I bid you welcome. But you must propitiate my wrath at losing that delicious nap by turning troubadour yourself, or rather, since you are one, by giving me a prolonged exhibition of your

He resumed his lounging attitude as he spoke, and Kenneth dropped into a place near him. It was the first time in months that the man had felt a moment's gayety of mood, and he gave way to it freely. Had his companion been a woman it would have been different. Reserve would have taken the place of spontaneity, even had she possessed the power of evoking the moodwhich is to be doubted, as Harding's

The boy, however, proved to be as parent inclination to mount and run merry a companion as Harding had tway changed quickly, however, and fancied. With quick wit he adopted the young man's assumption of the pedestrian no longer saw his face. medievalism and used quaint phrases Kenneth smiled with a trace of in a serio-comic way that amused his new acquaintance immensely.

Harding's artist-eye. His wheeling you to find out." costume, although really simple enough -a loosely fitting linen blouse of the explanations; and when she ceased thoughts in which he was absorbed. natural gray color, tie of soft blue speaking Harding said eagerly: "But

He could play | continued until the sun had fallen too rather well-had been member of the low to permit longer reading, then college banjo and mandolin club; and urged his companion to try a song or he could sing more than well, being two; and so the time passed until the for instance, present a field for agripossessed of a good tenor voice, admira- two suddenly realized that it was near- culture and stock raising equal to any ly dark.

"You'd better go. It is not a good road for a wheel after dark," said Kenneth. springing up. The boy did not rise. "All right; don't wait for me," he said. carelessly.

and may as well start together. Your low unequal to anything since the father's house has been pointed out to opening of Oklahoma and the Cherome, I think. Back on the hill, is it not? kee Strip. I thought so. Shall I help you get your wheel out? Where is it?"

for repairs," answered the boy.

"Then of course we will walk togethcheerfully. "Come, we shall be late for our dinner, if you don't hurry." He was beginning to wonder vaguely at when a sharp whistle, three times repeated, pierced the stillness. Frank answered it, and in another minute a boy of 14 pushing aside the branches came into view. At the same instant he called: "Frank! Fr-a-n-c-e-s K-a-the-r-i-n-e, where are you? Oh, there you are! Hurry up, sis, the Carrolls have come to dinner." Then, suddenly catching sight of Harding, he stopped.

Frank's face was as crimson as the sumach berries near, but with an attempt at carelessness, she said: "Mr. Harding, this is my brother Ned," springing to her feet as she spoke.

"I beg your pardon," Harding began, confusedly, feeling most unreasonably guilty. "I thought you were a boy, of course, or I would not have pre-

sumed as I did. I'm awfully sorry." In spite of her evident chagrin the girl laughed.

"I know it," she said, answering the first part of his speech, not the last, "and it was so jolly! When you saw me that day and I found that you is perfect for that industry. As in the was done every night, and frequently whom his scorn is directed. If you He looked picturesque, too, as he fun! ISLANDS OF ALASKA. Thousands of Rich Homesteads Wait-

ing for the Plow. In the mad rush for gold locked in the icy bosom of Alaska, other resources of that wonderful country have been overlooked. The Aleutian islands, in the world.

With Alaska for a market, the stock raiser and husbandman would thrive there as in no other part of the United States. If the advantages presented by these islands were fully known a "But we go in the same direction | stampede of homesteaders would fol-

State Factory Inspector William Anderson has turned his attention to "I walked to-day; my wheel is in the islands and made a study of their climate, resources and prospects. While others rushed through the Chiler, as far as you go," said Harding, kat pass in pursuit of that ignis fatuus, gold, he contemplated the neighbor islands, and from considerable reading on the subject has come to the concluhis companion's evident reluctance, sion that they present a better field for money making than the Klondike. Men who wish to engage in stock raising or pastoral pursuits are advised by him to try the Aleutian islands. There, as nowhere else in the country, are thousands of acres of rich, prolific land waiting for the plow and the homesteader. The prospect for the farmer and stock raiser is brighter there than it ever was, or is now, in the strip of Oklahoma, because of the richer land in the islands.

There are 150 of these islands, many of them adapted to grazing, grain and vegetable growing. Washed by the Pacific current, the climate is mild the year through. In the valleys farm products may be raised; on the table lands grass grows abundantly, affording sufficient fodder for cattle. Perhaps no other place in the world presents the advantages for stock raising afforded by the Aleutian islands. There would be no straying of cattle, no expensive round-ups. The cattle would thrive in open air the whole year. The climate away with the necessity of putting salt such conditions cause the animal to attain much heavier weight. A ready market, with cheap water transportation, is afforded in Alaska, British Columbia and Washington.

There is some talk among a handful of St. Louis capitalists of homesteading the islands for the purpose of cattle breeding on a large scale. In addition to stock raising there is the industry of fishing and sealing. There are about 2,000 Eskimos, all told, upon the 150 islands. They are peaceable, and make a livelihood by hunting and fishing.

Why risk the dangers of the Klondike when a safer and surer field presents itself in the islands?-St. Louis Globe-Democrat.

A BICYCLE TRAGEDY.

A Rash Youth Who Did Not Respect His Sweetheart's Preferences.

He was full of joy, and why shouldn't he be? Wasn't he riding a brand new wheel, and in another moment wouldn't he be by the side of the creature he adored above all'else in the world? Yea, in the street heard the report, and beat times he was even constrained to believe he thought more of this beautiful girl than he did of his bike.

He dismounted, opened the gate and with a proud step came up the graveled walk, leading his wheel. On the porch stood the girl who was his promised wife. A happy light shone from her she gave him made the young man feel

at peace with the world. Suddenly the girl cast a swift glance at the new wheel. She trembled and from her eyes and a sudden flush of indignation swept over her beautiful features. Drawing herself up proudly she cast a withering look upon the young man and said in a choked voice:

"Henceforth, Wheeler Sprocket, we meet as strangers. Our engagement is at an end. You have shown yourself in your true colors. A man who will not respect the feelings of his sweetheart will not love his wife. Go, I say, and never let me look upon your false face again. Oh, I hate you!" and she

stamped her tiny foot upon the floor. To say young Sprocket was thunderstruck at this unlooked-for and unaccountable outburst of passion from the girl he adored would put it mildly indeed. What had he done? he asked sane or was she only rehearsing her tinued so down to a very recent date. part in some private theatrical, where- But they have almost wholly disap- not move up. The machine was susin she had the role of the innocent victim of man's perfidy? Bracing himself up to the occasion, he managed to ex-

"Marguerite, I cannot understand your strange actions. Have I really of fended you in any way?"

Offendedme, Wheeler Sprockett! You have grossly insulted me. Oh, how thankful I am that I discovered your true nature before it was too late!" and the look of scorn she gave him almost crushed him.

"But, dearest," pleaded the young man, "you will at least tell me what I have done to offend you so?"

"Yes," exclaimed the girl, in a mock ing tone, "I would play the innocent if I were you. Buy a different make of wheel from mine, parade it before my very eyes and then ask me what you have done!"

Whereupon Marguerite Hamilton whirled upon her heel, entered her home and Wheeler Sprocket, realizing there was no hope for a reconciliation, mounted the new wheel and rode away.-Ohio State Journal.

A. Sad Affair.

"That's what comes of having such poor lights!" exclaimed the guest, as he rushed excitedly into the office. "Why, what's wrong?" asked the Jer-

sey coast landlord. "I met a bellboy in the hall just now

FRANK I, FRAYNE'S FATAL SHOT,

American Parallel to Recent Fatal Shooting on the Stage in Germany. The conviction of a German expert marksman in a Berlin court of the crime of "pandering to the public lust for excitement" was the result of an accident almost identical in every detail with a tragedy that occurred some years ago in this country. About six weeks ago in a Berlin music hall a marksman attempted to shoot an apple from the head of a young girl. He had frequently accomplished the feat before with success. But through some inaccuracy in aim the bullet, instead of passing through the apple, struck the woman in the head and killed her instantly. He was sentenced for this to six months' imprisonment. There was no charge of negligence or criminal intent. So the charge that he had attempted to "pander to the public lust

for excitement" was invented to fit his

The victim of the American tragedy was Annie Von Behren, and the man who shot her was Frank I Frayne, who, when he retired from the stage, had made a fortune through his expertness as a marksman. For many years he had traveled through the United States acting in a play called "Si Slocum." It was a rough-and-ready piece, devised chiefly to exhibit his skill in shooting see such things?" Pupil-"In my faand in the management of wild animals. He carried a whole menagerie about with him, and this method of exhibiting his talents had been adopted after an unsuccessful career as an actor. His wife, Clara Butler, who used to sing in his plays and act the part of Mrs. Slocum, was for a long time the woman on whom his feats of shooting were tried. One of the best-known of these was that in which, standing with his back to her, he shot an apple from her head, and, as in the story of William Tell, this incident was a crucial one in the play. When his wife died, a young Brooklyn girl named Annie Von Behren took her place in the company. The apple shooting feat was successfully continued for three years. It thought I was a boy, it seemed such British Isles, the salt in the air does twice at the many matinees given in happen to belong to that class, of course the cheap theaters at which Frayne the elevator boy is not to blame for appeared. Toward the end of November, 1882,

the company reached a theater in Cincinnati known as the Coliseum. It had been opened only two weeks when "Si Slocum" was acted there. On Thanksgiving day there were more than 2,000 persons at the theater at the extra | who got on his machine as if matinee. The play progressed to the scene in which the apple was to be shot from Mrs. Slocum's head. The apple was placed on the girl's head and Frayne took aim and fired. As they heard the crack of the rifle, the specta- ing trepidation, finally concluded he tors saw Miss Von Behren fall to the | would get an expression from the elestage with a spot of blood on her forehead. The actor turned, and, seeing the shaft for his temerity. One day what had occurred, ran to the spot he said: "Will, what would you do to a where the girl lay and fell fainting by her side. The curtain dropped suddenly, and the manager appeared before the curtain to announce that the play would be brought to an end immediately. Some of the audience had supposed that the scene was a part of the play. But it was soon whispered about that the girl had been killed. The holiday crowd fore long several thousand people had

targedy inside. The girl died within a few minutes after the bullet struck her over the left eye. Frayne, who was frantic with excitement, was locked up. The apple eyes and the glad smile of welcome was four inches above her head, and on a hat, and the accidental use of a defective cartridge was the cause of her death. Frayne protested that there was no danger in the backward shot, as it had repeatedly been done without serious results. The coroner's jury released him, and he declared he would never shoot again. But after a brief retirement he returned to the stage and acted in his drama for nine years longer, although he never repeated the back ward shot with a woman, and indeed abandoned the play in which the acci-

dent occurred. It is said of the German that he was about to marry the girl he killed, and the same story was told of Frayne and Miss Von Behren. He died about six years ago, and the shock he received when he killed the girl is said to have impaired his health seriously.

The shot that killed Miss Von Behren seems to have had a fatal effect on plays of this class. Twenty years ago they were highly popular, and they conpeared from the stage now.-N. Y. Sun.

Fear in Animals. Back in prehistoric times our ances-

tors probably knew fear as a constant feeling. They fought to defend their lives and homes from one another. With the beginning of agriculture and the domestication of animals, fighting ceased to be the chief object of existence, gentler feelings had a chance to grow, and fear was not so common a state of mind. But we are not in the condition of savage tribes. We do not live in fear ourselves, and we understand that the animals we have domesticated must be treated with uniform kindness. The horse is exceedingly nervous; while cattle do not appear so nervous, any dairyman will tell you that the utmost gentleness is necessary in caring for them. We can reason away most of our fears: neither the wild nor the domestic animals can do so much. The one way to teach an animal to conquer fear is to let him feel that he may trust us. It is the true and only way, for it leads to love and "perfect love casteth out fear."-Our Animal Friends.

AUTOCRAT OF THE ELEVATOR. All Mankind Must Stand in Great Awe

of That "Boy." It does the elevator boy an injustice when you think he has something against you. He has not. That is, not against you in particular. It is all humanity who ride in elevators against

He is essentially suspicious. He thinks the whole world is in a conspiracy against him. This is illustrated by a story told of a characteristically morose elevator boy in one of the big downtown buildings. He eyed every man to say: "Who told you you could ride on this elevator?" One of the office holders in the building who had been using the machine for a year or more, with constantly increasvator boy, even if he were thrown down man if he would tell you his honest,

candid opinion of you?" Without the least hesitation in the world the elevator boy said: "I'd smash him in the mouth." There isn't another man in the building who dares to ad-

dress the czar of the lifting machine. It will be noticed that the class of managers of the lifting machines are called "elevator boys." This is a misnomer. The geniuses who originally gathered in front of the building, al- presided over the machines were boys, though nobody knew certainly of the but so many accidents happened when the affairs were put into use that the boys were replaced by men, who are

> still out of courtesy called boys. As a rule, the elevator boy has an eve for the aesthetic as well as the beautiful. The Christmas season never passes that he does not decorate his machine with mistletoe. If a man asks him what he means by devoting so much time to embellish his lift, he simply remarks: "It's the beginning of the holiday season, and I like to call attention to the fact." He is beginning to thaw out for the regular annual Christmas and New Year's tips.

It was during the Hallowe'en season that an amusing incident happened in one of the big buildings in the business end of town. The elevator boy was one of those fellows who paid as much attention to his hair and necktie as a club man. There was not a single young woman in the building that he wasn't familiar enough with to address by her first name.

The lower floor on this occasion was erowded with anxious men who were frowning and swearing because the elevator would not come down. The upper floor was likewise crowded with men. who were also breaking one of the commandments because the machine would pended in midair. The electric bells were playing a sulphurous tune both above and below, and dire threats were made against the elevator boy. After an interval of perhaps 15 minutes the machine glided swiftly down the chute and came to a gentle halt. The door was thrown back by the elevator boy and his face was cut by a grin which extended from ear to ear. A pretty little miss stepped out, her face covered with blushes and her hat very much askew.

It was like oil on troubled waters. "Would I were an elevator boy," quoth the maddest of the former anxious passengers as he stepped respectfully into the machine: - Louisville Courier-Journal.

How a Horse Starts.

This was the subject of a recent communication to the Paris Academy of Science. Many instantaneous photographs were made of a horse in the act of starting from a position of rest, and a careful comparison of the pictures, combined with a study of the anatomy of the animal, led to conclusions which are said to be at variance with what has hitherto been believed. It would appear, from this evidence, that the forelegs play an important part in the propulsion of the animal from the very beginning of its motion, and that the breast muscles, remarkable for their agents in equine locomotion.—Youth's Companion

THE FARMING WORLD.

WATER FOR SHEEP.

Will Be Decimated. blood with whatever impurity may be from the field. For several years the contained in it. It is to some extent Massachusetts agricultural college strained or filtered of what it may have at Amherst has used small corn of solid matter not dissolved in it, but cribs as illustrated herewith. They whatever is held in solution, and some ere set up in any part of the field of what it may have that is not dis- or together in rows. If corn is rotated solved to some extent, goes into the on various fields the cribs are carried on blood with it. Thus impure water teams from the old to the new corn field poisons the very fount of life, says American Sheep Breeder, and carries into an animal what may be the most injurious to the health of it. There are, however, some injurious matters existing in water which are more especially deserving of notice on account of their very deleterious effects, such as the eggs or germs of organic matters, either vegetable or animal, as the spores of various minute plants, and the embryos of the most deadly parasitic animals. Of these may be mentioned the germs of epidemic diseases due to the growth in the blood of minute plants derived from these germs, and the deadly parasites such as the liver fluke, the various intestinal worms, and the ova of many tape worms. All these may be taken into sheep in water drank from streams or springs or most frequently from stagnant ponds. One of the most frequent sources of infection is the overflowing of pastures by streams into which a large extent of manured lands may have been drained, or into which the wastes of towns or cities have been discharged. On this account the shepherd cannot exercise too great caution for the protection of his flock, or estimate too highly those most favorable localities where the streams flow down uncleared mountain slopes, from the primeval forests, or where the sparse population has never defiled the soil with filth and impregnated it with the germs of disease. Nor can he estimate too highly the pure artesian fountain flowing from far down below the

Bore two holes for stakes, e e, near the outer ends of hind cross piece d. Fasten by chain in front, and half the terrors of fodder hauling have disappeared. A cross section is shown at the right of the illustration.-Farm and Home.

Preventing Egg Eating.

If an egg is broken the hens will eat it, and it is by eggs being broken that the hens learn the vice, as they never eat eggs unless they first find one broken. The only way to prevent the hens from eating eggs after they once begin is to make a nest with a top, compelling the hen to walk in to reach the nest, and have the box raised ten inches from the floor, so that the hen cannot stand near the box to eat the eggs. When she goes on the nest she cannot do any harm, as she must come off and stand up to eat the eggs .- Farm and Fireside.

Winter Grain After Potatoes.

Wherever the potato crop can be got uncertain in its action. off in time for seeding with fall grain it makes the very best seed bed. No plowing is needed if the weeds have sheep sheers or scissors. been kept down. It is only necessary to pile the potato vines in heaps and burn them, starting the fire in a brush heap if the potato tops are too green to burn readily. A great deal of plant food is developed after growing a crop of potatoes. It is largely nitrogenous, as the potato crop is chiefly water and carbon, with some potash, which is mostly found in the potato tops.

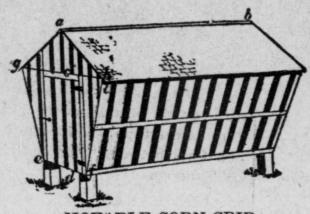

Turpentine Good for Roup.

MOVABLE CORN CRIB.

when empty. The crib (a to b) is 12 feet long and (a to d) 72-3 feet high, 51/2 feet wide (g to h) and 31/2 feet at the bottom (e to f). From a to i it is 51/4 feet, a to c 20 inches, c to d 6 feet and h to i 14 inches. The three floor frame length-12 feet long, while the front, center and rear end cross pieces are of 4 by 6 inch stuff. Each house stands on posts, is strongly made and well shingled. The door occupies the entire front end, being square; slats are placed across the door inside as the crib is filled and removed as corn is taken out. It is best to invert a pan on top of each post before building or setting the crib on the posts. Rats and small vermin will then be unable to get from the ground into the crib, provided snow in winter is kept clear.-Albert Rising, in Farm and Home.

FARM WATER SUPPLY.

On every farm where a windmill is

How to Construct a Reservoir at Moderate Cost.

used the additional cost of storing water other than that required for stock is little, and the expense of two or more windmills is less than the loss from drought. Where there is moderate rainfall the supply of moisture necessary to assist through a dry period is but little, and excellent results have been obtained by the use of large tanks, but a small reservoir can be constructed at a moderate cost. A tank ten feet high and ten feet in diameter holds 5,875 gallons of water; but as a reservoir can be provided to hold ten times that much at but little more expense the storage supply could be made ample. This does not imply that one is practicing irrigation, for to do so large storage reservoirs are necessary, but at a small cost the farmer can protect himself to a certain extent against drought. On fields of corn that have been grown by listing the centers between the rows were opened with a one-horse plow and water conducted so as to flow down the drains. Before the ends of the rows are reached the ground becomes well saturated, and a small piece may be irrigated each day. It must not be overlooked that the capacity of the tank does not limit the supply, as the pumps can furnish more water than the farmer may wish to use, and as a tank or reservoir may be drawn off and filled several times during the season the amount of water used will be considerable. Attention is called to this matter, as the cost is but little, and farmers will find it an advantage to experiment in that direction where it can conveniently be done.-Troy (N. Y.)

HINTS FOR FARMERS.

Sell direct to the consumer every time you can.

The young man can never buy a farm cheaper than now.

The crop of winter apples will be much less than last year. Corn stalks that grow unreasonably

big are all stalk and no corn.

Sorghum should never be planted until the soil is perfectly warm.

Subsoiling means more rapid drainage and better storage for rain. The farmer who plants more corn

than he has teams to stir the soil is unwise.

WELL PAID FOR SWEEPING.

Miner Found It Profitable to Pan Out the Sawdust.

"Yes," said the old miner who is known as a "forty-niner," "I am too brings back a lively remembrance of the old days in California, when flour sold at \$100 a barrel, and I got my first start on the road to fortune. Say, pard, can you lend me a match?"

He could, and did. The old miner twiddled it in his fingers for a spell, then he asked another question.

"Have you got any 'bacca?" He was handed a supply and told to help himself.

"Thankee," he said, "I carry my own pipe. Now, about this new excitement of finding gold, it was just so in '49 and '50-just so. Everybody going to California to make their everlasting for tune! I was a young feller then, and I blew into camp with the rest, and being a tenderfoot I didn't at first get the ghost of a show. I wrote home to my folks in the east, but it took a long time to get mail service, and when the letter came there was an express receipt for a small package. You'd never guess in a dog's age what it was. I had written home that I wanted something to keep body and soul together, and they sent me a bottle of glue. Mean, wise joists are of 4 by 4 inch material | wasn't it? They thought that as I had been so brash to go, I might get along the best way I could. It nerved me up to make a spoon or spoil a horn. I say, you fellers weren't any of you born then, so you can't remember Long Tom's saloon in Sonora."

> There was a general disclaimer from the crowd, and the old miner blew his pipe alive and resumed his yarn.

"Long Tom's was the big saloon of the place, and I drifted in and watched the men gambling, hoping that some of them would need an errand done and send me. I was not in it with the crowd, and I felt miserably lonesome and homesick in that rough, lawless community, where every man was toughened and seasoned to the life.

"As I said I was watching the men, some at tables gambling, the cards covered by sacks of gold dust from which they paid their bets and for the drinks. There would be a line of men at the bar, and as every drink cost 50 cents the men who served them were continually weighing out gold dust, and they didn't always stop to weigh it, but scooped it out on a guess. Then it was that an idea occurred to me that was worthy of my down-east origin.

"I waited until it was getting late, and the men who had been assembled there were dropping off, and I went to the proprietor of the place-the hardest citizen there-and asked him if he would let me sweep out the saloon for my breakfast. He answered me with an oath and lifted his hand to strike me, but something he saw in my face made him change his mind. He said: 'Yes, and be d-d to you,' and with that uncivil permission I went to work. Although it was Sunday morning the saloon was not to be closed, for some were playing who never stopped, and these were watched by a crowd known as 'tin-horn' gamblersthieves who stole the stakes when the men were not looking, and who were not meddled with, often on account of the terror they inspired. The floor of the place was a foot deep with sawfust, the tables, the proprietor helping me garnished."

"Well, he gave you your breakfast, didn't he? What has that to do with your stroke of fortune?"

"Patience, gentlemen. When I had swept that saloon I took the sweepings down to the flume and they panned out \$300 of gold dust. I kept on in that paying business until I acquired a claim and struck rich ore. I made-"

"A million?" interrupted the crowd. "No, gentlemen, but my expenses home again. But if I had only stayed there-"-Chicago Times-Herald.

Rarity of Congenital Teeth.

The fact that congenital teeth are so rarely met with is one of the most interesting in physiology. It is recorded that out of 17,578 new-born infants at the Paris maternity, in ten consecu tive years, only three had teeth, or not much more than one in 6,000. One of 500 cases collected at Magitat, in which the time of eruption of the first tooth was noted, in only one were there teeth at birth. After a close study of cases Heavy rains compact the soil and of this sort by Dr. Ballantyne, of Edincultivation separates it so that it can burgh, the presence of such teeth, he remarks, is likely to have an ill effect upon the lactation, partly on account of the imperfect closure of the infant mouth, and partly by the woundin The most fertile soil on earth cannot of the mother's nipple; they have prob grow crops without moisture to dissolve ably little or no prognostic significance as regards the bodily or mental vigo of the infant carrying them, and, a usually met with, are lower incisor though sometimes upper incisors an seen, but very rarely molars of either the upper or lower jaw. Such teeth ar caused by the premature occurrence of the processes which normally lead t the cutting of milk teeth; and, as the are usually incomplete and ill deve oped, and likely to be more of an incor venience than advantage to the infan they are best removed soon after birtl -Chicago Inter Ocean.

THE HEAT PLAGUE OF AUGUST, 1896.

Mrs. Pinkham's Explanation of the Unusual Number of Deaths and Prostrations Among Women.

The great heat plague of August, 1896, was not without its lesson. One could not fail to notice in the long lists of the dead throughout this country, that so many of the victims were women in their thirties, and women between forty-five and fifty. The women who succumbed to the protracted heat were women whose energies were exhausted by sufferings peculiar to their sex; women who, taking no thought

of themselves, or who, attaching no importance to first symptoms, allowed their female system to become run down. Constipation, capricious appetite, restlessness,

forebodings of evil, vertigo, languor, and weakness, especially in the morning, an itching sensation which suddenly attacks one at night, or whenever the blood becomes overheated, are all warnings. Don't wait too long to build up your strength, that is now a positive necessity! Lydia E. Pinkham's Vegetable Compound has specific curative powers. You cannot do better than to commence a course of this grand

of first symptoms you will see by the following letter what terrible suffering came to Mrs. Craig, and how she was cured: "I have taken Lydia E. Pinkham's Vegetable Compound and think it is the best medicine for women in

medicine. By the neglect.

the world. I was so weak and nervous that I thought. I could not live from one day to the next. I had prolapsus uteri and leucorrhœa and thought I was going into consumption. I would get so faint I thought. I would die. I had dragging pains in my back, burning sensation down to my feet, and so many miserable feelings. People said that I looked like a dead woman. Doctors tried to cure me, but failed. I had given up when I heard of the Pinkham medicine. I got a bottle. I did not have much faith in it, but

thought I would try it, and it made a new woman of me. I wish I could get every lady in the land to try it, for it did for me what doctors could not do."-Mrs. SALLIE CRAIG, Baker's Landing, Pa.

ENGLISH AS SHE IS SPOKEN. One Way to Spell Tomatoes, Five to

Pronounce It.

One word in its time has many pronunciations. For instance: Mrs. Housekeep the other day was doing her morning's marketing. With her had come the stranger who beans between her fingers to see that they that the corn was ripe, pulled the pears out of their paper wrappings and conducted herself generally after the manner of a careful housewife, was the clerk, order book in hand, and obsequiousness on his brow. The visitor began it with:

"These tomaytoes look nice. Get somethere's a dear! To which Mrs. Housekeep replied: "Why, certainly, if you lite them!" Then to the clerk: "How much are tomahtoes this

"I'm not sure; I'll ask. Jim," calling to a 27 says that on September 12 the new fellow clerk, "how much is them termait- traffic alliance between the Chicago, Mil-

"I'll ask the boss. Say," passing the word further back, "watcher gettin for tomattoes to-day? "T'mats? O, two baskets for a quarter,

Therefore, to please her guest who loved "tomaytoes," Mrs. Housekeep invested in some "tomahtoes" and Jim, who was investigating the price of "tomattoes" for the gurated. Tourist cars will be run once a benefit of a fellow clerk who wanted know how to sell "termaiters," was enlightened as to what he should charge for "t'mats." And the bystander was left marticle at the infinite variety of "English as Ry., 410 Old Colony Building, Chicago, Ill.

Where He Agreed with Him.

"What! What!" The irate old man choked with indigna-"You want to steal my child from me, to rob me of my daughter? Why sir!-

His rage got the upper hand of him, and he gasped some more-Rascal is no name for you!

In the face of such sublime gall what could

the old man do?-Puck.

Among the number of Baltimore fresh air fund children who passed through Washing. ton a few days ago, bound for the cool hill country of Virginia, there was one little fellow who found the very best quarters in a hospitable farmhouse at Front Royal When the cows came up in the evening to was spending a week or two within her gates. Standing by while she snapped the barnyard with his host to see the operation The cows were standing about placidly, and as is their custom at that time of the day, were contentedly chewing the cud. The boy watched the milkmaids at work, and his eyes dwelt with growing wonder on the ceaseless grind of the cows' jaws. At length he turned to his host and said:

An Expensive Bovine Habit.

"And do you have to buy gum for all them cows?"—Washington Post.

New Through Passenger Route for Colorado, Utah and California.

The Chicago Times-Herald of August waukee & St. Paul railway and the Chicago Rock Island & Pacific railway goes into effect, and on that date the former will send its first Denver sleeper out of Chicago. This will be attached to its regular night train for Omaha, and will be delivered there to the Rock Island. On October 2 the tourist car route over these two lines, the Colorado Midland and Southern Pacific, will be inau-

Boundless Egotism. "You ought to give up trying to sing. Don't your neighbors smash your windows when you sing of an evening?" said Gilhooly

"They don't do that because my singing is bad; on the contrary, they smash my windows so they can hear better."-Tammany

Outdone. Prof. Braintank-Newton was a great philosopher. By observing the mere fall of an apple he discovered the law of gravity.
Smithers—That's nothing. By simply biting an apple Eve discovered the gravity of law.—N. Y. Journal.

The Blue and the Gray.

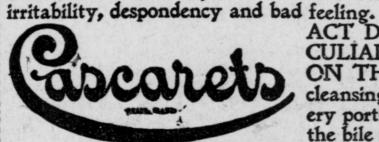

Both men and women are apt to feel a little blue, when the gray hairs begin to show. It's a very natural feeling. In the normal condition of things gray hairs belong to advanced age. They have no business whitening the head of man or woman, who has not begun to go down the slope of life. As a matter of fact, the hair turns gray regardless of age, or of life's seasons; sometimes it is whitened by sickness, but more often from lack of care. When the hair fades or turns gray there's no need to resort to hair dyes. The normal color of the hair is restored and retained by the use of
